

BOOKLET OF SERVICE  
UNDER GUARANTEE

Iseo Rivolta

# CONDITIONS OF GUARANTEE

## Terms of the guarantee

ISO-Rivolta cars are guaranteed against possible defects of materials and workmanship, under normal conditions of use and service.

The guarantee is valid for six months or up to 10000 Km - 6000 Miles, whichever is first. It commences from the date of delivery of the vehicle and is valid only in respect of the first owner who has purchased the vehicle from an authorised sales agent.

The guaranteed does not cover tyres, battery, the carburettor, instruments and some other units not manufactured by the factory.

The guarantee obligation assumed by ISO is limited to the replacement or the repair, ex-works, of parts which are recognised as defective in material or workmanship in the opinion of the technical department of ISO, this opinion being incontestable. The labour costs for disassembling and re-assembly, transport and any on-the-spot inspections, are on the account of the owner of the vehicle.

## Cancellation of the guarantee

The guarantee on the part of the manufacturer is no longer valid:

- in the event of change of ownership of the vehicle.
- if the defects or the damage discovered are caused by negligence in the standard of maintenance or misuse of the vehicle.
- if repairs or modifications are carried out other than in workshops authorised by the manufacturer, such a way as to prejudice the working life or the strength of any part.
- if the vehicle has taken part in sporting contests or has been used for purposes different from those for which it is intended.

## Responsibility

The manufacturers consider themselves free from any responsibility for possible injuries to persons or things deriving from the use or the possession of ISO-Rivolta vehicles.

Moreover, the manufacturers shall not be liable for any damage arising from breaking-in, theft, fire or other cases of « force majeure » which may affect the vehicle or the property of the customer on the premises of ISO or in the workshops of authorised sales agents.

The manufacturers reserve the right to carry out without previous notice any modification or improvement of their products, without this constituting a duty to make the same modifications to previously manufactured vehicles.

The performance data supplied are purely indicative and are not formally binding.

## USE OF THE FREE SERVICE COUPON

Owners of ISO-Rivolta vehicles are recommended, in their own interests, to avail themselves in good time of our free maintenance service, where expert mechanics will supervise the initial period of use of the vehicle, giving appropriate advice and checking the normal functioning of the various components.

For this purpose, each vehicle is accompanied by a free service booklet which contains a coupon entitling the owner to service and maintenance after 1000, 2500, and 5000 Km (600, 1500 and 3000 miles).

The labor expended in carrying out the above operations is free of charge: only the cost of lubricants will be charged.

If during these operations it is necessary to carry out other works not listed on the coupons, the terms of the guarantee shall be applied, whenever the work is covered by them.

In order to obtain free service, the customer is required to approach the sales agent from whom he obtained the vehicle. It is possible, however, to apply another ISO authorised agent, in the event of change of address or if a long journey would otherwise be involved.

The coupon must be used solely within the period of validity indicated otherwise it is considered cancelled. The validity ceases in any case with the expiration of the guarantee.
